## Discussion with Kintech

resolved

purchase from Mar 17, 2025, 8:24 PM

April 14, 2025 at 9:25 AM

Reason for starting Discussion: **defects emerged during use**

Dysk SSD Samsung MZ-77E2T0 2TB 2,5" SATA III 870 EVO

Problem description: Hi,

I finally installed the 4 SSD drives three days ago, and one of them started to disconnect randomly. When I start the computer, it's recognized, but after some minutes, the drive is off and cannot be accessed or anything. I have tried with different power and data cables, but always the same result.

I need a replacement or refund as soon as possible. How can we proceed?

The SN is S5Y4R010A077819.

Thanks

Expected solution: **exchange**

Re: Ticket: 431368 - Authenticity verification request - 4 x Samsung SSD 870 EVO 2TB (MZ-77E2T0B/EU)

Samsungmemory Support12:26 PM (25 minutes ago)

to me

Dear Mr. Galán,

Thank you for contacting Samsung Memory Support.

We are sorry to learn that you are having issues with your.

We regret to inform you that all SSDs are not a genuine Samsung SSD. Please be informed that genuine Samsung SSDs are provided with a specific type and structure of model name and serial number in a specific manner on the back of the SSD.

We do hope that we have adequately informed and assisted you. Should you have any other questions, please do not hesitate to contact us.

Mit freundlichen Grüßen/ Best regards/ Met vriendelijke groet

Frau/Mrs. Antonia S.  
Customer support team

On Fri, 2 Oct at 12:01 PM, Diego Rueda Galán <diego88aku@gmail.com> wrote:

Dear Samsung Memory Support Team,

I am writing to ask you to verify the authenticity of four SATA SSDs that were sold to me in Poland as new Samsung SSD 870 EVO 2TB (MZ-77E2T0B/EU, EAN 8806090545900). I bought them on 17 March 2025 from a business seller on the Allegro marketplace.

Serial numbers (as printed on the labels and as reported by the drives):  
SSY4R020A077805  
SSY4R020A077806  
SSY4R020A077808  
SSY4R020A077877

Why I doubt they are genuine:  
1. Labels: all four labels show the same WWN (5002538F2000CAB) and the same PSID (YRR72JB0YU84ENPZP05K1AVSR2A11AWK); only the serial number differs. The labels also read: PN MZ7L32T0HBLT, MODEL MZ-77E2T0, 2024.12, PRODUCT OF KOREA.  
2. Firmware: the drives report W0814A0 (three units) and W0724A0 (one unit), not an SVT0x86Q version.  
3. The drives report no WWN electronically, declare ACS-2 / SATA 3.2 and expose 30 SMART attributes; their SMART data identifies the controller as "SMI2259XT".  
4. One unit reports a capacity of 2,048,408,248,320 bytes instead of 2,000,398,934,016 bytes.

Could you please confirm in writing:  
1. whether these four serial numbers exist in Samsung's records as genuine Samsung SSD 870 EVO 2TB drives;  
2. whether Samsung has ever released firmware W0814A0 or W0724A0 for the 870 EVO;  
3. whether these drives are covered by the Samsung manufacturer warranty.

I need your written answer for a consumer complaint against the seller. A photo of the four labels, enlarged label photos and a technical summary with the drives' own identification data are attached. I can provide the seller's details, the full smartctl output or further photos if needed.

Thank you in advance for your help.

Kind regards,
